FOR IMMEDIATE RELEASE

ICIS Welcomes a New Technical Coordinator

It is our pleasure to announce that Steve Mark joined the ICIS team on June 28, 2010 as Technical Coordinator. Steve's focus is on providing professional member support and managing the integration of all member derived geospatial data. His experience brings a high level of expertise to these important and vital ICIS initiatives.

Steve has an extensive background in GIS and Geography. He has experience in a variety of industries including forestry, wildlife management, resource management, oil and gas, land tenure, and demographics and has worked on GIS projects involving data conversion and translation, spatial analysis, database management, map layout and design, and spatial and attribute editing.

Throughout his career, Steve has gained considerable experience in land base and cadastral mapping. He has worked with a variety of cadastral datasets at both the municipal and Provincial levels where he has been responsible for compiling, inventorying, and analyzing datasets from a variety of different land agencies. Steve recently obtained his Geographic Information Systems Professional (GISP) designation from the GIS Certification Institute. Please join us in welcoming Steve Mark as the newest member of the ICIS team!

To contact Steve, please call the ICIS office at (250) 381-9295 or toll-free at 1-866-403-0095, or email him at smark@icisociety.ca.
