FOR IMMEDIATE RELEASE

Town of Creston is Awarded \$5,500 through ICIS' CivicSpatial Grant Program

ICIS is pleased to support the Town of Creston in the work they are undertaking to align their mapping with the Central Kootenay Regional District (RDCK) cadastre.

The Town of Creston has already spent considerable time and effort to bring their mapping into an AutoCAD based system. With the support of the CivicSpatial Grant Program, Creston will now be able to bring this extensive spatial data into alignment with the common base used by the RDCK. Integrating cadastre in the Creston area will provide accessible, useable spatial data and value for both the local and regional community and for their fellow ICIS members.

For more information on the types of projects currently supported by the program, please visit the [ICIS website](#) under [CivicSpatial Grant Program](#).

ICIS is a non-profit society created to collaboratively share and integrate spatial data for the economic and social benefit of British Columbia.
