

## Key Issues to be address before starting conflation project

- Which landbase do we adopt? ICIS?
- How and who maintains the new land based once the assets are shifted to it?
- How do you identify and migrate landbase polygons not in the adopted land base (ie. Right-of-ways, services roads, etc.)?
- How do you updated the landbase - delta only or complete update?
- How do you handle new developments that may take months to get updated in the ICIS cadastral?
- Is there a Business Case for us to get out of the Landbase business ...
