ICIS launches 2014 series of Regional User Conferences

In 2013, ICIS Ops made the decision to bring back the ICIS User Conference after receiving several site visit requests from members throughout the province. As the Team discussed the best format and venue for the event, the question was asked: 'Why not bring ICIS directly to our members in a regional format?' Thus began the 2013 series. Based on the success of the 2013 events, ICIS is bringing the Regional User Conference back for 2014!

We will be starting 2014 with a bang as we prepare 8 (yes, 8!) events across British Columbia. A tentative schedule includes:

- East Kootenay Regional District (April)
- Kelowna (May)
- Fort St John (June)
- Fraser Fort George Regional District (June)
- Prince George (June)
- Cariboo Regional District (July)
- Burnaby (in conjunction with our 13th Annual General Meeting: September)
- Nanaimo (November)

Registration and specific locations for each event will be made available once dates have been finalized. Though we will be revisiting the same locations as 2013, the presentations will be fresh with exciting updates and the introduction of new ICIS initiatives.

Want to know how you can get involved? We are seeking venues and presenters for each location. The conferences are about you, our members, so if you have an exciting update that would be relevant to the event let us know!

Stay tuned for more information on when ICIS will be coming to your area... we look forward to meeting with you in 2014!
