

INTEGRATED CADASTRAL INFORMATION SOCIETY

Access to Utility Data

Local Government, First Nations, and Provincial members are provided with viewing access to utility data with membership. To download utility data, members are required to sign an Addendum to the Data Sharing and Licensing Agreement confirming that any data downloaded will be stored on domestic servers.

For Associate members, a fee schedule applies for access to utility datasets. Access fees are calculated based on the number of parcels in your area of interest (out of the total parcels province-wide) and vary with the utility datasets included, as outlined in the tables below. The area of interest is defined at the Regional District level, which is the smallest geographic unit used for calculating access fees.
